

Beat Genius - PDF:

PRODUCER INFO

I started of just Makin beats at somethin to do for fun a couple years ago but now I've taken the time to take it seriously and try to master the art of producing. I do genres from Hip-Hop, RnB, Club/Pop, Crunk. The sound of my influences can be heard in some of my beats of course. I also go to college full time and work also so I can't say I can fully 100% focus on the beats until bigger projects/money is aimed my way. I aim to please my customers and society when making my beats and the beats I make can often be fueled by the mood I'm in. If you are a customer buying a beat from me, you are getting quality work that has alot of work put into it. Its definitely gonna make peoples heads nod!
